PROFESSIONAL SUMMARY

Senior Software Engineer and Team Lead with 6+ years designing, building, and deploying scalable, secure web platforms, APIs, and payment systems. Back-end specialist in Laravel (PHP) and Python (Django/Flask), currently leading a team of 5 on a KYC platform serving 1M+ monthly users in 150+ countries at 1M+ requests/day. Ships Anthropic Claude API features to production. Domain experience in RegTech (KYC/AML), FinTech, HealthTech, and multi-tenant SaaS.

TECHNICAL SKILLS

Languages & Frameworks: PHP (Laravel 5.x–13.x, CodeIgniter), Python (Django, Flask, FastAPI), Node.js, JavaScript (Vue.js, React), HTML, CSS, Bootstrap
Back-End & APIs: RESTful API Design, Webhooks, Third-Party Integrations, Stripe & PayPal, Payment Gateways, Livewire
Databases: PostgreSQL, MySQL, MongoDB, Redis, DynamoDB (Relational & NoSQL)
Cloud & DevOps: AWS (EC2), Docker, Nginx, CI/CD, Server Deployment
AI & LLM: Anthropic Claude API, LLM Features, Tool Use / Function Calling, Agentic Workflows
Leadership: Agile/Scrum, Sprint Planning, Roadmap Ownership, Code Reviews, Architecture Decisions, Mentoring

PROFESSIONAL EXPERIENCE

Senior Software Engineer / Team Lead | *Programmers Force* *Jan 2025 – Present*

- Lead a team of 5 engineers on a KYC and identity verification platform serving 1M+ monthly users in 150+ countries at 1M+ requests/day; own the technical roadmap and delivery with product, QA, and operations.
- Led the migration of a multi-server platform to a decentralized architecture, removing single points of failure and supporting a 99.9% uptime SLA.
- Hardened real-time KYC stream processing against injection attacks and closed critical security gaps.
- Integrate Anthropic's Claude API into production — LLM features, tool use / function calling, and agentic workflows.
- Run sprint planning, code reviews, and architecture decisions; worked on AML Watcher and built Facie.ai.

Software Engineer | *Programmers Force* *Oct 2022 – Dec 2024*

- Built Laravel and Python (Django/Flask) verification APIs on PostgreSQL, MySQL, and Redis; deployed with Docker on AWS.
- Cut per-verification processing time by 60% using rule engines and parallel API calls; owned features from estimation to delivery.

Laravel Backend Developer | *Coding Pixel* *Dec 2021 – Oct 2022*

- Built Laravel applications and secure RESTful APIs, including Livewire interfaces, for web and mobile clients.
- Integrated Stripe and PayPal with webhook-driven transaction states and retry logic; deployed and managed servers on AWS.

Software Engineer | *Tech Andaz* *Sept 2020 – Dec 2021*

- Built server-side features and APIs in PHP, Laravel, CodeIgniter, and MySQL; designed schemas and refactored legacy code.

KEY PROJECTS

FinTech Payments & Wallets (*Personal*) — Gateway integrations, webhook-driven transaction states, ledgers, refunds, and retries.
Facie.ai (*facie.ai*) — Built this consumer AI photo app at Programmers Force.
AML Watcher (*amlwatcher.com*) — AI anti-money-laundering compliance platform (sanctions, PEP, adverse media screening).
Meal Minion (*mealminion.com*) — Modules for an all-in-one restaurant SaaS: POS, inventory, online ordering, payroll, and accounting.
V.ARIA Health (*v-ariahealth.com*) — End-to-end telehealth flow: patient questionnaire, checkout, physician dashboard, e-prescriptions.
Fyfer (*fyferapp.com*) — Back-end APIs, social and workout-tracking features for an iOS fitness app connecting users with trainers.

EDUCATION, CERTIFICATIONS & LANGUAGES

BS Computer Science | *National College of Business Administration & Economics* *Sept 2016 – Jun 2020*
Certification: Claude Code in Action — Anthropic (Apr 2026) | **Languages:** English (Professional) · Urdu (Native)
Recognition: Employee of the Month ("Force of the Month"), Programmers Force
